### Engineering & Design Services

We are here to help you through your entire project. Our experts at Kadco do more than just produce your parts, we assist in all stages of product design and development involving even the most difficult materials. We always strive for high quality and low costs throughout design and production. Some areas we specialize in include:

- Material selection
- Determining tolerance limits
- Creating part drawings in Auto CAD
- Conversion of engineering design formats (eg. .igs) into machine code (eg. .nc)
- SmartScope measurements
- Coordination with outside fabricators

Regardless of what stage of product development you are in, we can work with you to make your product a success. The more information we have from you, the better. Please contact us to get started.
